

How to change Pulls on Nylon Zippers

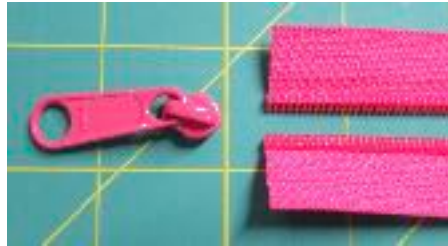

Sue Bouchard

The zipper pulls must be the same size and brand as the zipper.

1. Cut off Stopper at end of Zipper.

2. Unzip to remove current pull.

3. Cut out about 4-5 'Teeth' on right side on zipper tape.

4. Thread new zipper pull on left side.

5. Insert right side keeping the ends as even as possible.

6. This can be done from both ends. Also you can change colors of left and right zipper tape .
