

2026 Moores Cancer Center Group Block - Cornered Cabin

Deadline: All blocks are due back no later than the **November** guild meeting.

Unfinished Block Size: 9.75"-10", will be trimmed down to a uniform size once all blocks have been collected

Fabric Colors: For this quilt, we will be using a palette of aqua/teal, citron/gold, berry/red leaning purples, and white/low volume prints that contain the same colors as the main palette. Black or grey designs are fine, but shouldn't be of a large scale. Prints are shown in the image below, but feel free to mix in solids as well.

Please use a standard scant 1/4" seam allowance to insure that your block is sewn up to the required size.

Materials:

- 1 square between 4.5" and 6"
- 2 strips between 2" and 4" x 22"
- 3 small squares between 2" and 3.5"

There is no specific order to the colors or placement - just stick to a variety of colors from the palette. Please vary the sizing of your fabric widths to add some interest to the final block.

TIP: A good way to know if you've chosen the right size pieces (large square and strips) to make the correct size block, is to add up the widths and then subtract 1" for the seam allowances.

For example, on the top image of the sample blocks, the **top left block** has a 5.5" square, with strips that are 2.75" and 2.5".

$5.5 + 2.75 + 2.5 = 10.75$ and then subtract 1, which will give an unfinished size of 9.75".

The **bottom right block** has a square that is 4.5", with strips that are 2.25" and 4".

$4.5 + 2.25 + 4 = 10.75$ and then subtract 1, which will give an unfinished size of 9.75"

Directions:

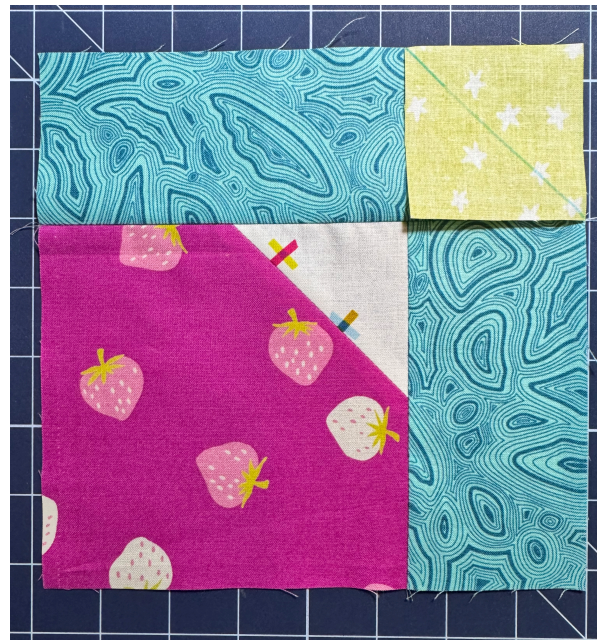

1. Take one small square and draw a diagonal line on the wrong side from corner to corner. Place right sides together with the large square in one corner and lining up the top and right sides. Sew on the drawn line and trim 1/4" from the line. Press as desired. (Squares in the example are pressed open)

2. Take one of the strips and sew on pieces to the top and right sides, making a sideways “L” with the snowballed corner. Press these as desired. (Strips in the example pressed toward the strip)

3. Repeat step one with another small square.

4. Repeat steps two and three with the last strip and small square.

Once you have finished step 4, your block is complete. Be sure to measure your unfinished block to make sure it still fits the required size.
